FAHRI EFE YANIKLAR

Data Science Student

+(90) 541 685 77 91 – linkedin.com/in/fahriefeyaniklar/ – github.com/fahriefe – fahriefeyaniklarr@gmail.com

PROFILE

Data-driven and detail-oriented Data Science student with a strong foundation in statistics, programming, and analytical thinking. Experienced in data analysis, visualization, and machine learning fundamentals, with a growing focus on applying data-driven approaches to real-world problems. Passionate about continuous learning and building scalable, impactful solutions.

EDUCATION

Bachelor of Science in Data Science, IU International University of Applied Sciences, 2024 – 2027
Associate's Degree in Web Design and Coding, Ankara Science University, 2024 - 2027

CERTIFICATIONS

A selection of my certifications is listed above. For a comprehensive list, please visit my LinkedIn profile or feel free to request them directly.

- Excel Essential Training(Microsoft 365), National Association of State Boards of Accountancy, 2024
- Data Analyst Associate, DataCamp, 2024
- Machine Learning with Python, freeCodeCamp, 2024
- Python for Data Science, AI & Development, IBM, 2024
- Databases and SQL for Data Science with Python, IBM, 2024

SKILLS & PROJECTS

- Programming Languages: Python, R, SQL, Java
- Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, TensorFlow
- Data Visualization: Matplotlib, Seaborn, Power BI
- Databases: PostgreSQL, Microsoft SQL Server, SQLite, MySQL
- Tools & Platforms: Git, GitHub, Jupyter Notebook, Microsoft Azure
- Web Technologies: HTML, CSS, Bootstrap

Projects:

Neural Network SMS Text Classification

- Developed a deep learning model for SMS spam detection using Python and TensorFlow (Keras)
- Applied NLP techniques including text encoding, tokenization, and sequence padding
- Built and trained an embedding-based neural network, achieving ~98.9% validation accuracy
- Performed data preprocessing using Pandas and NumPy

Health Cost Prediction (Regression Model)

- Built a regression model using TensorFlow (Keras) to predict healthcare costs
- Applied data preprocessing and one-hot encoding for categorical feature
- Achieved ~2035 MAE on test data using a neural network architecture
- Evaluated performance with MAE and MSE metrics and visualized predictions

Habit Tracker Desktop Application

- Built a desktop habit tracking application using Python and PySide6 (Qt)
- Designed a SQLite database with full CRUD functionality
- Implemented user input validation and habit streak tracking logic
- Developed an interactive GUI with real-time data display

Other Projects: See full portfolio at github.com/fahriefe
